**Subject:** Mill Pond - Joanies expansion

Good Morning -

I would like to share that if anything at all has to be done to that pond, or shoreline, then it needs to have approval of the Army Corp Engineers. We as well as our neighbors at 4135 Three Lakes Drive, had to go through the process with the Army Corp to restore the shoreline of our properties, (directly behind the restaurant). The pond is considered wetlands and anything at all that affects the pond, shoreline will need to be approved by the Army corp of Engineers because of the effect on the Lake County Watershed.

I look forward to Monday's meeting to see why the "special permit" should be changed for this restaurant. The 32 person, 8 tables only, should remain in effect with no enlarging the outside area.

Regards,

Debbie Handler
