

## SOLAR AES REGULATIONS - OTHER COMMUNITIES

**Barrington** – No regulations found

**Barrington Hills** - No regulations found

**Hawthorne Woods** – Allows an integrated (shingles) or building mounted solar system; regulations attached. No ground mounted solar systems allowed (adopted 2017).

**Deer Park** - Very much the same as Hawthorne Woods.

**Kildeer** – Very much the same as Hawthorne Woods; Passed by the Corporate Authorities; 21st day of January 2020

**Lake Zurich** - No regulations found

**Vernon Hills** - It appears these regulations apply to heating & cooling applications as opposed to power generation.

4.6.8.2. In any required rear yard, the following additional obstructions are permitted, but not to exceed 40 percent cumulative rear yard ground coverage:

4.6.8.2.1. Central air conditioning units, heat pumps and solar collecting equipment, but not more than four feet from the principal structure, provided the unit is properly screened;

Screening; completely screened from view on all sides, with solid fencing of either wood or masonry construction (wireless communication towers may be landscaped however).

**Green Oaks** - No regulations found

**Lake Bluff** – Allows only a solar AES; building or ground mounted. Ground mounted systems require a SUP. See attached regulations.

**Lake Forest** – Regulations apply to heating & cooling applications as opposed to power generation.

**Highland Park** – Allows only Wind Energy Systems (WES); building or ground mounted.

**Wadsworth** - Allows wind, solar geothermal AE systems. See attached regulations for solar and geothermal systems.
