Re: 2023 Road Maintenance Program
Construction Commencement Notification

www.gha-engineers.com

Via Hand Delivery

Dear Neighbor:

On behalf of the Village of Long Grove, we would like to notify you that construction of roadway improvements at various locations throughout the Village is anticipated to commence by Monday, September 11, 2023, weather permitting with the installation of construction signage. This project is part of the Village's continued program to improve the infrastructure throughout the community.

In accordance with the Village Code, construction working hours are from 7:00 a.m. to 7:00 p.m. during the week and 8:00 a.m. to 5:00 p.m. on Saturday. With limited unforeseen occurrences and weather permitting, we anticipate work shall be substantially completed by early October.

The work consists generally of pavement removal and replacement, pavement patching, driveway pavement removal and replacement, concrete curb spot repairs, and landscape restoration as needed. The work planned for each roadway segment varies, so not all the work mentioned above will occur over the entire length of the project. Furthermore, please understand that due to the geographical size of this project, work may start and stop along the roadway as several of the operations are typically completed in phases. The streets scheduled to receive these improvements are as follows;

Street	From	To
W Creekside Drive	Indian Creek Road	Terminus
Arrowhead Court	W Creekside Drive	Terminus
Tribal Court	W Creekside Drive	Terminus

While the operations will create brief delays in traveling your street or entering/exiting driveways, we do not anticipate any long-term closure of the streets. Access to all homes and businesses will be maintained throughout the construction.

Please be advised that all proposed construction is within the Village right-of-way. Where private improvements are in the parkway or Village right-of-way, (such as sprinkler systems, electronic invisible dog fence, landscape features, special decorative rocks, special vegetative plantings, etc.), we will attempt to work around them, but the Village will not repair or replace private improvements within the parkway or Village right-of-way that are damaged during construction operations.

As with any construction project, there will be inconveniences at times and we thank you in advance for your patience and cooperation. The Village and the Contractor are working together to minimize the disruption and inconvenience you will experience. Please travel carefully through the construction zone.

If you require special assistance or should have questions about the project, please feel free to contact our Resident Engineer, Sarah Witte at (901) 303-1012 (switte@gha-engineers.com), myself at (312) 806-8727, or you can contact the Village at (847) 634-9440.

Sincerely,
Gewalt Hamilton Associates, Inc.

Jennifer Beckman, P.E.
