CALL TO ORDER:

VISITOR BUSINESS:

ACTION ITEMS:

- 1) Approval of the February 10, 2020 Draft Meeting Minutes.
- 2) Consideration of a request for permanent signage for "Corked" (formerly the "Chit Chat Room") 132 Old McHenry Road within the B-1 Historic District, submitted by Roman Signs.
- 3) Consideration of a request for subdivision identification signs for the Herons Landing PUD/Subdivision located at the intersection of Port Clinton and Blue Heron Roads, submitted by Mr. Dan Egan, President of the Herons Landing HOA.

OTHER BUSINESS:

ADJOURNMENT:

Next Scheduled Meeting: June 15, 2020 @ 7:00 PM

The Village of Long Grove is subject to the requirements of the Americans with Disabilities Act of 1990 Individuals with disabilities who plan to attend this meeting and who require certain accommodations in order to allow them to observe and/or participate in this meeting, or who have questions regarding the accessibility of the meeting or the facilities, are requested to phone David Lothspeich, Long Grove Village Manager at 847-634-9440 or TDD 847-634-9650 promptly to allow the Village of Long Grove to make reasonable accommodations for those persons.

ITEM #2: For the ARCHITECTURAL COMMISSION; 5.18.20 @ 7:00 P.M.

<u>REQUEST</u>: Consideration of a request for permanent signage for "Corked" (formerly the "Chit Chat Room"), 132 Old McHenry Road within the B-1 Historic District, submitted by Roman Signs.

HISTORY/STAFF REVIEW:

The property in question is located on the north side of Old McHenry Road and is adjacent to Towner Green and across from "The Tavern". The space was previously occupied by the "Chit Chat Room".

As submitted the petitioner proposes three signs; a hanging sign (22"x 44") measuring 6.2 sq. ft. (and two menu panels for total of 7.48 sq. ft.) and an identical free standing ground sign measuring 6.2 sq. ft. and a wall sign proposed over the entry way measuring 8" x 90.5" or 4.97 square feet.

The hanging sign will also include two (2) menu panels suspended below the main sign measuring 6" x 16" (.664 square feet each or 1.28 square foot total). The hanging sign, including, panels has a total square footage of 7.48 sq. ft.

Total square footage of all signage requested equals 18.65 square feet. Square footage of the commercial space for which the sign is being requested is approximately 1,400 square feet. For retail spaces containing 1,001 to 3,000 sq. ft. of floor area 20 square feet of signage may be allowed.

Based upon the total square footage of signage proposed (18.65 square feet), the requested signage is within the maximum square footage of signage permitted at this location. Signage may be divided up between wall signs, hanging signs and freestanding signs but may not exceed the maximum allowable square footage allocated by floor area.

The hanging sign would be mounted to the existing post in front of the building along Old McHenry Road. The free standing sign will be mounted to 4" x 4" posts located in front of and centered on the porch of the existing structure. The wall sign will be mounted over the stairway entering the building. The hanging and ground signs will be constructed of sandblasted HDU (2" thick) with a wood look finish. The logo and border will be raised. The wall sign would be made of MDO board and will not have any raised features (i.e. "flat"). All signs would be painted with grey copy & borders on a dark charcoal gray background. The 4 x4 posts will be painted to match the background as well. The signs appear to be non-illuminated or will utilize existing illumination as no request for illumination is included with the request. (See proofs attached).

SIGN REGULATIONS:

The following are excerpts of applicable portions of the Village Sign Ordinance:

- (d) <u>Business District Signage</u>. The cumulative size of all signs permitted by this ordinance shall be governed by the square footage of the associated business as follows:
- (1) Except as otherwise authorized by variation pursuant to section 5-11-15(E)1(c) of this code, the cumulative total square footage for all signs shall not exceed the following:

<u>MAXIMUM SIGN AREA PERMITTED IN</u> BUSINESS ZONING DISTRICTS IN SQUARE FEET

	B1	B2	B2
Total Area of Business in Square Feet	No Arterial	Access	Arterial Access
1-1,000	12	12	20
1,001-3,000	20	20	30
3,001-5,000	30	30	40
5,001 or greater	30	30 ⁽ⁱ⁾	50 ⁽ⁱⁱ⁾

- (i) For each additional 2,000 square feet, an additional 10 square feet of signage is permitted. The maximum total signage area shall not exceed 50 square feet.
- (ii) For each additional 2,000 square feet, an additional 10 square feet of signage is permitted. The maximum total signage area shall not exceed 70 square

ARCHITECTURAL COMMISSION DECISION:

The signage as proposed is permissible with regard to type of signage, size and location. The proposed signage is below the maximum amount of signage permissible at this location and therefore meets the signage size standards found in the Village Code.

The Commission should also review the request for signage against the aforementioned regulations, the downtown design guidelines and render a determination based upon those criteria as well as the appropriateness of the signage at this location in relation to other signage in the vicinity.

ITEM #3: For the ARCHITECTURAL COMMISSION: 5.18.20 @ 7:00 P.M.

<u>**REQUEST:</u>** Consideration of a request for subdivision identification signage for the Herons Landing PUD\Subdivision located at the intersections of Port Clinton and Blue Heron Roads, submitted by Mr. Dan Egan, HOA President, on behalf of the Herons Landing HOA.</u>

HISTORY/STAFF REVIEW:

Proposed Project:

The request is being made on behalf of the Herons Landing Homeowners Association to allow the installation of two (2) new subdivision identification signage at the entrance to the subdivision. The existing ground sign at the subdivision entrance, located in the entrance island will be removed. The proposed signage will be located on both sides of Blue Heron Road at its intersection with Port Clinton Road.

The new signage will consist of two stone monuments with copy mounted to the monument faces. The signs will be single faced and constructed of stone to reduce maintenance and deterioration of the signage over time. Each monument will be 16' wide and consist of two pillars with one end measuring 6' and 5' on the other. The face of the monument will taper in height from 5' to 4' between the pillars. The monuments will be constructed of will be Chilton Weathered Edge stone and the copings/pillar caps will be Bluestone.

The copy will consist of black powder coated steel/aluminum lettering in a Lucinda Calligraphy font and spell out "Herons Landing". Capital letters will measure 1' in height, lower case letters will measure approximately 7.5" in height. Lettering will mounted into the sign face which will be left natural in color.

Illumination is proposed. The existing post lights will be removed and capped off with junction boxes to make the electrical connection at this location. Up lighting utilizing three (3) thirty-five watt LED floodlight fixtures 2700 to 3000 K (Dauer 490010 "Diplomat") are proposed to be ground mounted in front of the sign with illumination directed toward the sign face. Fixtures will be screened by vegetation in planting beds in which they will be placed. Down lighting is also proposed via four (4) four watt LED fixtures 2700 K (Dauer 490082 "Timberline") to be placed under the cap stone on the top of the monument signs. See the attached spec sheets for the lighting and the sign plan.

Based upon staff review of the proposal, approximately 10 square feet of signage is requested for each sign face for a total of 20 square feet of signage. This is in compliance with the Village Code requirement of a maximum of 40 square feet for such signage and no more than two (2) such signs. An excerpt of the Village Code regarding subdivision identification signage is listed below. The signage is proposed to be 5 feet from any right-of-way line and 18" behind the "vision triangle". This signage should not interfere, confuse, or mislead traffic movement as it setback any right-of-way and configured so as not to obstruct, impair, obscure, or interfere with the views of a vehicular driver, pedestrian, or cyclist.

SIGN REGULATIONS -

(c) Subdivision Signs: A sign identifying the location and name of a subdivision may be installed at the entrance of the subdivision, subject to compliance with the following standards:

(1) Number Of Signs: No more than two (2) subdivision identification signs shall be permitted for each subdivision.

(2) Size: The cumulative total area of the subdivision identification signs permitted by subsection $(G)_2(c)(1)$ of this section shall not exceed forty (40) square feet in dimension.

(3) Lighting: A subdivision identification sign may be illuminated, subject to compliance with the following standards:

A. Type Of Lighting: A subdivision identification sign may utilize one of the following methods of illumination: sign mounted canopy light or ground mounted spotlight. Only white or clear incandescent illumination sources shall be permitted.

B. Direction Of Illumination: The illumination source shall only be directed onto the face of the subdivision identification sign.

C. Visibility Of Illumination Source: The illumination source or filament shall not be visible from adjacent lots.

D. Maximum Illumination: The maximum illumination for a subdivision identification sign shall not exceed two (2) foot-candles within a distance of one foot (1') from the surface of the subdivision identification sign and shall not emit any measurable illumination (i.e., 0 foot-candles) at the lot line most proximate to a subdivision identification sign.

E. General Restrictions: The illumination of the subdivision identification sign shall comply with the provisions of subsection (D)1 of this section.

Traffic Safety: No sign or sign structure shall be permitted or maintained at any location where by reason of its position, size, shape, design, or color it may obstruct, impair, obscure, or interfere with the views of the vehicular driver, pedestrian, or cyclist. No sign will be permitted that could be confused with any traffic control signal or device. No sign will be permitted where it may interfere, confuse, or mislead traffic movement.

ARCHITECTURAL COMMISSION ACTION:

Proposed signage is approvable per the village code. The Commission should review the request for signage in light of the aforementioned of regulations and render a determination based upon those criteria as well as the aesthetics of the signage at this location.

MODEL: 490010 "Diplomat" LED MR16/Bi-Pin Wall Wash Fixture

SPECIFICATIONS

HOUSING:

Cast brass with weathered brass finish. Angled shroud with gasketed lens.

SOCKET/LAMP HOLDER:

One fixed ceramic bi-pin socket accepts MR16 with GU5.3 base or bi-pin lamps with G4 and GY6.35 bases.

LENS:

Clear and frosted tempered glass lenses included.

LAMP TYPE:

12V SMD or encapsulated bi-pin or MR16. 35W maximum. See Dauer lamp ordering information on back page.

MOUNTING:

Stem threaded with 1/2" NPT. Heavy-duty composite stake included. May be mounted into threaded hubs in junction boxes or mounting accessories shown on back page.

WIRING:

Prewired with 5' pigtail of 18/2 cable.

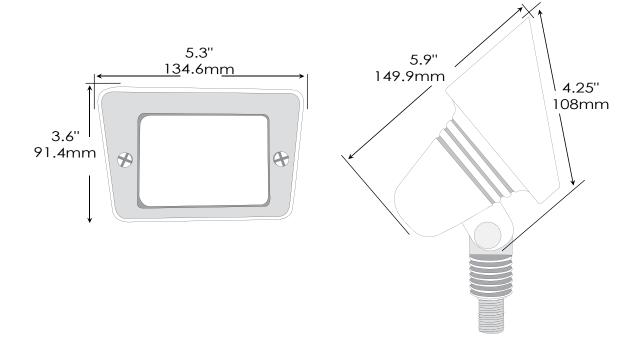

WARRANTY:

Lifetime.

DIMENSIONS:

The cast brass Diplomat large wall wash casts a very broad and even light on surfaces and scenery. Choose between the included clear and frosted lens options. Dozens of bi-pin lamp options maximize your creative expression for wall washing applications, or install an MR16 LED lamp if you desire a longer throw or narrower, more directional beam-spread options ranging from 15° to 100°. Heavy-duty stake included.

SPECIFICATION SHEET Page 2 MODEL: 490010 "Diplomat" LED MR16/Bi-Pin Wall Wash Fixture

LED LAMP SPECIFICATIONS

LAMP TYPES:

Dauer MR16 UL-listed (E353116) 12V lamp suitable for enclosed luminaires, or Dauer IP65 outdoor-rated SMD or encapsulated bi-pin, all with 5-year warranty.

OPTICS:

MR16 integral optics providing available beam spreads from 15° to 100°. No optics for SMD or encapsulated bi-pin lamps.

COLOR TEMPERATURES:

Color temperature options provide the following qualities: 2800K and 3000K=warm white; 4000K=neutral white; 5000K and 6000K=cool white. Decorative color light options include amber, blue, green, and red.
